

## Ballasts

UV SYSTEC GmbH provides suitable ballasts for every UV lamp (also from other manufacturers and suppliers).

Ballasts are available with following main specifications:

- dimmable or non-dimmable
- one or two-flamed
- for lamp power between 6 - 800 W.

All types of available electronic ballasts are short-circuiting and ground-proof as well as open-circuit-proof. Our ballasts are very reliable in practical use.

In order to ensure high efficiency or to prevent potential damage the ballasts are adapted to related lamps.

For this purposes UV SYSTEC GmbH offers its customers a fitting service during new installation and replacement services.

You forward to us 1 - 2 lamp or ballast samples and we supply you with the adjusted lamp and ballast counterpart.

We also manufacture ballasts and lamps according to your specifications.
